Outlook and review of public tenders

Formal aspects and basic notes

1) Legal advice and support from PwC Legal

2) All SCS contracts are put out to public tender

3) Members of the Open Source Business Alliance are not preferred - all interested parties (from germany or foreign countries) have the same chances

4) The tender documents are published via the German Procurement Portal (DTVP)

5) Once an award is published, the project management team is no longer allowed to have conversations about it, all questions only via DTVP

6) We do not place orders for work where we expect finished products

7) But: We conclude framework agreements for programming services and other services

8) We expect competencies, skills, experience and intensive cooperation of the offered developers in our community

9) Besides developers, we expect a concept for the work, so only qualitative aspects are decisive for the award, the price is not a deciding factor, because we assume a fixed price

Outlook and review of public tenders

1) Successful public tenders

    1) Legal advice and support → PwC Legal

    2) VP01: OpsTooling, CI Tests Infra/IaaS, Metal as a Service, Life Cycle Management
       → OSISM GmbH

2) Upcoming decisions

    1) VP10: SCS certification → decision this or next week we hope

3) Planned publication of the next public tender

    1) VP06d: Container Monitoring / IaC / CI / Deployment Automation
       → before Christmas, at least for three weeks

    2) VP09b: Supply Chain Security (Research and development order to a university)
       → Beginning of 2022

4) All other public procurement will be tendered from January to mid-2022 (in the best case)
The following is planned, but that depends, among other things, on the number of offers…
